Computer Science student at James Madison University with experience developing software in team-based environments. Skilled in web development, systems programming, and Agile/Scrum development, currently expanding my skills in computer graphics with a growing interest in video game development.

EDUCATION

James Madison University - Harrisonburg VA, BS in Computer Science - GPA: 3.912

Aug 2023 - May 2027

- **Coursework:** Computer Graphics, Application Development, Web Development, Computer Systems I/II, Software Engineering, Applied Algorithms, Data Structures & Algorithms, Discrete Structures

SKILLS

Languages	Python, Java, C, Ruby, Haskell, Rust, JavaScript, TypeScript, HTML/CSS
Tools	Git, $\text{\LaTeX}$, Bootstrap, Linux, Scrum, tmux, VS Code

EXPERIENCE

Camp Counselor

James Madison University School of Music

Jun 2026

Harrisonburg, VA

- Managed 140 students, ensuring students were in the correct locations at the scheduled times
- Supported fellow assistants by helping complete tasks while they were actively teaching their students

PASS Leader

James Madison University Learning Centers

Jan 2025 — May 2025

Harrisonburg, VA

- Facilitated peer-assisted study sessions for 20 MATH 231 students
- Led two weekly meetings focused on problem-solving and conceptual understanding
- Participated in professional development and leadership training
- Conducted peer observations to continuously improve instructional effectiveness

PROJECTS

RimpleX

- Co-developed a fully functional imaginary number calculator with multiple features as part of a 6-member team over an 8-week development cycle.
- Applied Agile/Scrum methodologies, including sprint planning, daily stand-ups, and retrospectives, to manage development timelines and team coordination
- Contributed to feature design and implementation, collaborating cross-functionally to deliver a working product within sprint deadlines

Crate

- Co-developed a music discovery web app using the Spotify API to search albums, view details, and track listings
- Built a personal collection feature letting users save, rate, and review albums, with data saved locally and export/import to JSON
- Added sorting, filtering, and a responsive layout so the app works well on both desktop and mobile
- Built a Weekly Haul feature showing users' listening trends by genre/type, along with a shareable graphic for social media

LEADERSHIP

JMU Marching Royal Dukes

Visual Section Leader

Aug 2025 — Present

- Partnered with the leadership team to plan and run efficient, well-organized rehearsals
- Taught marching fundamentals and visual performance techniques to 70 trumpet section members
- Served as a mentor and role model, supporting section members' development and morale

Upsilon Pi Epsilon

Member

Apr 2026 — Present

- Inducted into the international computing honor society, restricted to the top 11% of CS majors in 2026.
